

METHODS OF SAMPLING AND TESTING
MT 601-08
MATERIALS SAMPLING, TESTING AND ACCEPTANCE GUIDE - INDEX
ENGLISH VERSION

1 Scope:

- 1.1** This procedure is intended as a general guide to assist in determining the basis of sampling, testing, inspection and acceptance of various materials and products commonly used on our highway projects.

2 General:

- 2.1** Listed in MT-601, Sections I and II, are various materials and products, the basis of acceptance for which may vary depending on the specifications, procedures or circumstances relating to these items.

3 Samples and Certification, MT-601, Section I:

- 3.1** In general, the department's responsibility is to assure that the material is sampled at the appropriate interval and the contractor is responsible for taking a representative sample.
- 3.2** Steel items require material certifications from manufacturers or suppliers that meet MDT specifications (refer to subsection 106.03, Certification of Compliance, 2006 Standard Specifications for Road and Bridge Construction). The appropriate certifications, material test reports, and mill test reports must be provided by the prime contractor and attached to two copies of the completed form 406. The material certifications must be signed by a manufacturers authorized representative, clearly identifying each lot of certified material or assemblies delivered to the work and the Form 406 must be signed by the prime contractor. The two copies of the Form 406 are then submitted with all the supporting documentation from the field to the Materials Bureau (1 copy) through the District lab (1 copy), with a properly filled out form 46. The form 46 must be signed by the MDT inspector making the acceptance and be submitted through the Project Manager. The contractor should be aware that without proper certification, one or the other of the following conditions will affect final acceptance:
- 3.2.1** The Project Manager can allow the materials to be incorporated into the work; however, will not pay for the material until certification is made available. If the certification indicates the material does not meet MDT specifications, the Project manager can have the material removed at the contractor's expense, or accept it at a reduced price.
- 3.2.2** The Project Manager will not allow the material to be incorporated into the work.
- 3.3** In general, unless acceptance can be made on the manufacturer's certification, outside testing agency or on field inspection reports, every item used must be sampled and tested with a statement of laboratory acceptance received before it can be incorporated into the work.
- 3.4** Other than proven trade name products which are discussed below in article 4, all major items to be sampled and tested, and all items that may be accepted on the manufacturer's certification or label are listed in alphabetical order with instructions for sampling, testing, and acceptance in MT-601, Section I. Whenever a conflict exists between a particular test method and MT-601, MT-601 will govern.
- 3.5** Acceptance of an established product may be made by the field, based on the manufacturer's certification and previous satisfactory field performance. Random samples will be taken by the field and tested by the Materials Bureau at least once a construction season.

4 Trade Name Products & Qualified Products List materials, MT-601, Section II:

- 4.1** All miscellaneous trade name products listed in Section II of MT-601 can be accepted in the field based on manufacturer's certification as long as the certification complies with subsection 106.03 (Certification of Compliance, 2006 Standard Specifications for Road and Bridge Construction). Products in Section II of MT-601 have been pre-qualified by the Materials Bureau and have proven to be acceptable when used and applied in accordance with the manufacturer's recommendations. They are acceptable for use without Materials Bureau approval, but cannot be used as a substitute for another product, grade, type, or class without prior written authorization by the Materials Bureau. To assure specification compliance, submit check samples to the Materials Bureau periodically for testing. Visual checks should also be made to verify the condition of the material.
- 4.2** In order to assure adherence to specifications, check samples should be submitted to the Materials Bureau periodically for testing. Visual checks should also be made to verify the condition of the material prior to use.

5 Inspected Items (Outside Testing Agency or MDT Laboratory)

- 5.1** Inspect all fabricated items during fabrication. Deliver this material to the project with permanent marks, identifying that it has been inspected, such as a metal tag (wood products), or a circle M stamp (RCP or CSP pipe, steel items, miscellaneous concrete products and signs). See attached for "Certification of Materials."
- 5.2.1** When properly marked materials are delivered to the project, they must be accompanied by a form 406 signed by the prime contractor unless accepted under 5.2.2. Attach the appropriate materials certifications, material test reports, and mill test reports to the form 406 and submit the complete package along with two copies to the Project Manager. Certifications must be submitted from the plant or point of manufacture and be completely filled out and signed by an authorized representative of the supplier. A more detailed report will follow from the inspection agency including mill tests, material certifications and the origin of manufacture for steel products.
- 5.2.2** When properly marked materials are delivered to the project, they must be accompanied by a certification of materials report or a mill report submitted from the plant or point of manufacture and be completely filled out and signed by an authorized representative of the supplier. Acceptance of the applicable certifications, material test reports and mill test reports may be made by the agency inspector for some items inspected during fabrication, such as Corrugated Steel Pipe (CSP), Reinforced Concrete Pipe (RCP), Precast Concrete Beams, and some structural steel items. The fabrication plant inspector will complete the applicable inspection form or an inspection report for the item(s) inspected. The inspector certifies all steel test reports and certifications for the material incorporated into the finished products have been received and reviewed when signing the inspection report.

The inspector then E-mails or FAXs the completed form to the MDT Engineering Project Manager and the District lab for the project. The inspection form will list the items inspected and accepted by the inspector. The inspector will maintain and file mill test reports, material test reports and manufacturer certifications for the items inspected in the materials file in the District office where the inspection is made. This file is for documentation purposes should an audit be required. The supporting documentation does not need to be sent to the Engineering Project Manager or the District lab for their files. A copy of the completed form with all applicable documentation attached must be sent to:

Certification Compliance
Materials Bureau
2701 Prospect Avenue
PO Box 201001
Helena, MT 59620-1001

- 5.3 Properly marked materials delivered to the project without a certification of materials or mill reports can be incorporated into the project at the Project Manager's discretion, but payment for the materials will be withheld until the reports are provided. It is the prime contractor's responsibility to ensure that proper reports are delivered to the Project Manager.

6 **Qualified Products List:**

- 6.1 The Materials Bureau maintains the Qualified Products List. MDT will confirm that the materials appearing on the Qualified Products List meet the specifications described in the product specific item. Some materials may be accepted through the QPL or by product specific testing.
- 6.2 *Quality Control Testing* – The MDT requires that all products in the QPL perform quality control (QC) testing on their material.
- 6.3 *Disqualification* – Products that do not perform or are found to be non-compliant with MDT specification may be removed from the QPL at any time and remain unlisted until such time that adherence to the specifications can be verified and the product has undergone satisfactory performance evaluation.
- 6.4 NTPEP Listings – Products that have been accepted by NTPEP can be added to MDT's QPL if the product meets our specifications. MDT will not require test samples to be sent in for testing. The NTPEP test results will be accepted in place of MDT's test results. If the product has been removed from NTPEP's list it will be removed from MDT's list. If a producer still wants their product on MDT's QPL then it will have to be tested by MDT's laboratory.

7 **Small Quantity Items:**

- 7.1 Projects requiring only small quantities of materials may not require standard acceptance sampling and testing. Items such as Grade C Plant Mix under 500 tons, paint under 25 gallons and minor quantities of concrete are examples. When items are designated as small quantities by the Project Manager, their acceptance will be based upon proper documentation, such as concrete mix design checks, air and slump test results, aggregate gradation results, etc. The Project Manager will notify the Helena and District Labs, in writing, whenever items are accepted on this basis.

8 **Optional Samples:**

- 8.1 All materials incorporated into the project, whether represented by actual samples or by certification, are subject to final field inspection and acceptance by the Project Manager. He has the option to obtain more than the required minimum number of samples and to submit as many additional samples as he deems necessary to insure conformance to specifications.

9 **Samples:**

- 9.1 Samples of material to be incorporated into the work must be sampled by the contractor and witnessed by an MDT representative in order to be classified as **official** samples.
- 9.2 *Acceptance Samples* - Department personnel or an authorized representative will witness samples taken by the contractor.
- 9.3 *Quality Assurance* – Perform sampling for QA according to Montana Standard Specifications for Road and Bridge Construction for the item to be sampled. Department personnel or an authorized representative will witness samples taken by the contractor.
- 9.4 *QPL Random Testing and Auditing* – MDT reserves the right to sample materials on the QPL for testing and to perform audits of test reports. MDT representatives may sample material from the manufacturing plant, the project site, and other locations. MDT reserves the right to test samples to verify compliance with Standard Specifications for Road and Bridge Construction and corresponding

9 Samples: (continued)

supplemental specifications. Producers must maintain a complete record of all test reports for the previous two years and current calendar year.

- 9.5** *Independent Assurance (IA)* - The Department requires that all sampling and testing for Independent Assurance purposes be accomplished by Department personnel or authorized representatives. IA samples must be taken under the direct supervision of the Materials Supervisor or his authorized

9 Samples: (continued)

representative and must not be scheduled on such an inflexible and regular routine that its frequency can be predicted, but sufficient samples must be submitted to satisfy the frequency intended.

- 9.6** *Final Record (FR)* - **FR samples cannot be taken by personnel who generally do the sampling.** They must be taken by or under the direct supervision of the Materials Supervisor or his authorized representative and must not be scheduled on such an inflexible and regular routine that its frequency can be predicted, but sufficient samples must be submitted to satisfy the frequency intended. FR samples are to be taken in accordance with MT-602, section 5.

- 9.7** *Portland Cement* - Samples will be taken by the Materials Bureau from Montana manufacturers and suppliers. A minimum of two samples will be taken annually, more may be taken if necessary. The purpose of this sampling and testing is to establish agreement between the manufacturer's certifications and the testing done by the Materials Bureau. The Materials Bureau is inspected and accredited by the Cement and Concrete Laboratory (CCRL) as established by the National Bureau of Standards (NBS). Sampling from the project for acceptance purposes will be taken on a random basis by District personnel in accordance with MT-108. Acceptance is based upon conformity to both physical and chemical requirements listed in the specifications.

10 Forms and Reports:

- 10.1** Regardless of the basis of acceptance, the method of identification of all items incorporated in the project must be documented in the project records.
- 10.2** Most major materials to be tested have a report form designated for their exclusive use (see MT-513). These forms shall be completed as fully as possible and followed by distribution as indicated.
- 10.3** Materials not covered by a designated report form must be accompanied by a Miscellaneous Samples Lab Form 45. This form must be fully completed. The form must have the following information: project number, project name, date, name of the sampler, district/area, name of the product, quantity, name and address of the manufacturer, supplier and jobber, and the distribution. In the case of acceptance on the basis of certification or field inspection, a Form 46 or form 406 should be used. A remark must be made that a sample is not being submitted and acceptance is on the basis of an authorized prequalification program, manufacturer's certifications or labels.

Form No. 406

**CONTRACTOR'S CERTIFICATE OF COMPLIANCE
FOR MISCELANEOUS STEEL & IRON ITEMS
For Compliance with the "Buy America" Provision
Std. Spec 106.09 & 23 CFR 635.410**

MDT FIELD ID
DATE-INSPECTOR'S INITIALS

MDT Project No. _____ Project Name _____

The _____
(Name of Manufacturer/Supplier) (Address) (City, State) (Phone)

has furnished to _____
(Name of Contractor) (Address) (City, State) (Phone)
 the following materials for use in the construction of the above referenced project.

MDT Bid Item No.	Product Description	Quantity *	Unit LF, YD ² , m, m ³ , etc.	Heat Number	Category 1 or 2

Submit all required documentation with this form. See the back of this form for general guidance on the "Buy America" documentation. Refer to MT 601 for sampling & testing requirements.

☐

Contractor's Statement of Certification

Domestic Material. I hereby certify that all manufacturing processes, including application of coating, occurred in the United States for the above listed materials and that those materials do meet all other requirements as set forth in the plans and specifications.

☐

Non-Domestic Material. I hereby certify that the above listed materials do meet the requirements as set forth in the plans and specifications with the exception that all or part of the manufacturing process may have occurred outside the United States. The material is considered non-domestic. The cost of this material, including delivery to the project, is _____.

By _____ Title _____
 (Prime Contractor's Name, Typed or Printed)

 (Prime Contractor's Signature) Date _____

**CONTRACTOR'S CERTIFICATE OF COMPLIANCE
 FOR MISCELLANEOUS STEEL & IRON ITEMS
 For Compliance with the "Buy America" Provision
 Std. Spec. 106.09 & 23 CFR 635.410**

Note: Two copies of this certificate and attachments, along with the original, must be submitted to the MDT Engineering Project Manager for each type of material before that material can be used on the project. The Prime Contractor is responsible for providing proper documentation to MDT, and no payment will be made until that documentation is provided.

The form must be completely filled by the Prime Contractor. A list of materials, which may be accepted upon receipt of this form and proper documentation, is on the back of this form.

Copies of this form can be obtained from the MDT Materials Bureau, 2701 Prospect Avenue, PO Box 201001, Helena, Montana 59620-1001, or phone (406) 444-6300 or (406) 444-6298 or on the internet at www.mdt.state.mt.us. It is under MT -601 in the Montana Materials Manual.

MDT Materials Bureau will conduct random checks of documentation to confirm compliance to the "Buy American" requirement (Std. Spec. 106.09 & 23 CFR 635.410), and may require mill tests at that time. All certifications must have the "domestic steel" statement on them and be signed by a representative of that company. **There is no change in Quality Assurance procedures including sampling and testing requirements (refer to MT 601).**

For Buy America documentation, steel items are divided into 2 categories. A general guide is given below. The category of an item may vary on a case-by-case basis depending on the quantity and usage. The Project Manager determines the category of an item.

Category 1

Bridge Beams
 Plate Girders
 Piling (Most Items)
 Diaphragms
 Drilled Shaft Casing
 Fluted Steel Piling
 Frang. Sign Post Breakaways
 Guard Angles
 Guardrail (Most Items)
 Guardrail Posts (T-101, etc.)
 Impact Attenuators
 Luminaire Standards and Lighting
 Pedestrian Stairway
 Reinforcing Steel
 Sign Posts and Bases (Most Items)
 Structural Steel Plate Pipe (SSPP)
 Welded Wire (Most Items)
 Wire Rope (Most Items)

Category 2

Barbwire
 Butterfly Valves
 Cattle Guard and Wing Ends
 Steel Conduit
 Corrugated Steel Pipe (CSP)
 Delineator Posts
 Ductile Iron Pipe
 Fencing (Most Items)
 Gate Valves
 Ice Breakers
 Irrigation Canal Gate
 Trash Guard
 Smooth Wire
 Stock Tank
 Steel Water Service Line
 Miscellaneous Nuts, Bolts, etc.

**CONTRACTOR'S CERTIFICATE OF COMPLIANCE
 FOR MISCELLANEOUS STEEL & IRON ITEMS**

***For Compliance with the "Buy America" Provision
Std. Spec. 106.09 & 23 CFR 635.410***

Some items, like reinforcing steel, will be in different categories for different uses. In major items such as bridges, it should be considered Category 1.

The required Buy America documentation varies for these categories.

Category 1 requires this form, full Mill Test Reports and documentation on all other steps in the process.

Category 2 requires this form and material test reports and certifications.

For non-domestic material, documentation of the cost of the material including delivery to the project is also required.

* Only list the actual quantities delivered to the project.

This page intentionally left blank.

EPOXY RESIN AND ADHESIVE; FOR BONDING FRESH TO HARD CONCRETE. STD. SPEC. 551		1 PINT OF EACH COMPO- NENT	1 SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION, SUBJECT TO TESTING WHEN REQUESTED BY THE MATERIALS BUREAU.
EPOXY; FOR BONDING HARDENED TO HARDENED CONCRETE STD. SPEC. 551		1 PINT OF EACH COMPO- NENT	1 SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION, SUBJECT TO TESTING WHEN REQUESTED BY THE MATERIALS BUREAU.
EXPANSION JOINT FILLER; POURED (HOT AND COLD) STD. SPEC. 707	SAMPLE RANDOM	1 QUART	1 QUART FOR EACH LOT WITH FORM 45 AND MATERIALS CERTIFICATE.		

NOTE: Numbers in parentheses are page numbers

MATERIAL	TEST/ SAMPLE METHOD	SAMPLE SIZE	SAMPLING, TESTING AND ACCEPTANCE ISSUED BY		
			FIELD	DISTRICT/AREA LAB	MATERIALS BUREAU
EXPANSION JOINT FILLER; PREFORMED (CORK, ETC.) STD. SPEC. 707	SAMPLE RANDOM	6"X24"	1 SAMPLE WITH MATERIALS CERTIFICATE PER PROJECT /CONTRACT.		
FENCING; BARBED WIRE, WOVEN WIRE, CHAIN LINK, HARDWARD, TIE WIRE STD. SPEC. 712	SAMPLE MT413	MT413	1 SAMPLE PER 50 ROLLS SELECTED AT RANDOM. MINIMUM OF 1 SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING.
FENCING; STEEL FENCE POSTS STD. SPEC. 712	SAMPLE MT413	1 PER 400	1 SAMPLE PER 400 POSTS SELECTED AT RANDOM.	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND DISTRICT/AREA LAB TEST RESULTS.	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING WHEN REQUESTED BY DISTRICT/AREA LAB.
FENCING; WOOD FENCE POSTS STD. SPEC. 712	NONE	NONE	VISUAL INSPECTION.		PRETESTED AT THE MILL/TREATING PLANT BY THE MATERIALS BUREAU AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.
FERTILIZER; UNDER 500 POUNDS STD. SPEC. 713	NONE	NONE	ACCEPTED ON MANUFACTURER'S CERTIFICATION.		
FERTILIZER; OVER 500 POUNDS STD. SPEC. 713	SAMPLE MT403	1 QUART	1 RANDOM SAMPLE OF THE BLENDED FERTILIZER FROM EACH SHIPMENT SAMPLED AT THE PROJECT / CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING.
FIBER REINFORCED PADS BY SPECIAL PROVISION OR PLANS			DIMENSION OR WEIGHT CHECK FOR COMPLIANCE.		

NOTE: Numbers in parentheses are page numbers

MATERIAL	TEST/ SAMPLE METHOD	SAMPLE SIZE	SAMPLING, TESTING AND ACCEPTANCE ISSUED BY		
			FIELD	DISTRICT/AREA LAB	MATERIALS BUREAU
FLY ASH		5 LB.	SEE SPECIAL PROVISIONS.		FLY ASH SOURCES ARE SUBJECT TO PRE-QUALIFICATION – ACCEPTED ON MANUFACTURER'S CERTS. AND MATERIALS BUREAU TESTING. SEE SPECIAL PROVISIONS.
GEOTEXTILES; CONSTRUCTION - WOVEN, NONWOVEN STD. SPEC. 713	SAMPLE MT421	MT421	1 SAMPLE FOR EACH 10,000 SQUARE YARDS. MINIMUM OF 1 SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING.
GEOTEXTILES; EROSION CONTROL BLANKETS STD. SPEC. 713	NONE	NONE	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SATISFACTORY FIELD PERFORMANCE.		
GEOTEXTILES; GEOGRID, GEOMEMBRANE BY SPECIAL PROVISION	SAMPLE MT421	3'x ROLL WIDTH	1 SAMPLE FOR EACH 10,000 SQUARE YARDS WITH MATERIALS CERTIFICATE. MINIMUM OF 1 SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING.
GLASS BEADS; STD. SPEC. 714	SAMPLE MT419	2 - ONE QUART CANS	2 - ONE QUART SAMPLES FROM EACH LOT, RACK OR BATCH NUMBER, UP TO 10,000 LBS., AND ONE SAMPLE FOR EACH ADDITIONAL 10,000 LBS. OR FRACTION THEREOF.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND MATERIALS BUREAU TESTING.
GUARDRAIL & MEDIAN RAIL; - HARDWARE; STD. SPEC. 705	NONE	NONE	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND FORM 406.		RANDOM SPOT CHECKS.
GUARDRAIL & MEDIAN RAIL; - STEEL STD. SPEC. 705	NONE	NONE	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND FORM 406.		RANDOM SPOT CHECKS.
GUARDRAIL & MEDIAN RAIL; - WIRE ROPE STD. SPEC. 705	NONE	NONE	ACCEPTED ON MANUFACTURER'S CERTIFICATION AND FORM 406.		RANDOM SPOT CHECKS.

NOTE: Numbers in parentheses are page numbers

MATERIAL	TEST/ SAMPLE METHOD	SAMPLE SIZE	SAMPLING, TESTING AND ACCEPTANCE ISSUED BY		
			FIELD	DISTRICT/AREA LAB	MATERIALS BUREAU
GUARDRAIL & MEDIAN RAIL: WOOD POSTS & BLOCKS STD. SPEC. 705	MT404	NONE	VISUAL INSPECTION		INSPECTED AT THE MILL/TREATING PLANT AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.
INSULATION; SPECIAL PROVISIONS OR PLANS	NONE	NONE	DIMENSION CHECK.		
MULCH; STD. SPEC. 610	MT403	MT403	1 RANDOM SAMPLE PER PROJECT/CONTRACT.		ACCEPTED ON SATISFACTORY TEST RESULTS.
NURSERY STOCK; BY SPECIAL PROVISIONS OR PLANS	MT403	MT403	FIELD INSPECTION AND ACCEPTANCE.		
PAINT; TRAFFIC STD. SPEC. 714	MT410	2 - 1 QT. SAMPLES	SAMPLE EACH LOT OR BATCH OF PAINT USED ON THE PROJECT.		ACCEPTED ON SATISFACTORY TEST RESULTS.
PAINT; NON TRAFFIC UNDER 25 GALLONS STD. SPEC. 710	NONE	NONE			
PAINT; NON TRAFFIC OVER 25 GALLONS STD. SPEC. 710	MT410	2 - 1 QT. SAMPLES	SAMPLE TO INCLUDE LABEL FROM CAN.		ACCEPTED ON SATISFACTORY TEST RESULTS.
PAVEMENT MARKING MATERIAL; EPOXY STD. SPEC. 714	MT410	1 QT. EACH OF PIGMENT & CATALYST	5 RANDOM SAMPLES PER PROJECT/ CONTRACT REPRESENTING 10 OR MORE LOTS, 1 RANDOM SAMPLE UNDER 10 LOTS, INCLUDE MFG CERT		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SATISFACTORY RESULTS.
PAVEMENT MARKING MATERIAL; TEMPORARY & INTERIM, STD. SPEC. 714			SUBMIT A MANUFACTURER'S FORMULATION SHEET OR DATA SHEET FOR THE PRODUCT TO BE USED.		

NOTE: Numbers in parentheses are page numbers

MATERIAL	TEST/ SAMPLE METHOD	SAMPLE SIZE	SAMPLING, TESTING AND ACCEPTANCE ISSUED BY		
			FIELD	DISTRICT/AREA LAB	MATERIALS BUREAU
PAVEMENT MARKING MATERIAL; PREFORMED PLASTIC STD.SPEC. 714	MT410	1 QUART EACH OF PIGMENT & CATALYST	1 SAMPLE EVERY 1000 LINEAL FEET, MINIMUM OF 1 PER PROJECT/CONTRACT. SUBMIT ON FROM 45 WITH MANUFACTURER'S CERTIFICATION.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SATISFACTORY RESULTS.
PAVEMENT MARKING MATERIAL; THERMOPLASTIC STD. SPEC. 714	MT410	1 LB. OF SOLID MATERIAL OF EACH COLOR	5 RANDOM SAMPLES PER PROJECT/CONTRACT REPRESENTING 10 OR MORE LOTS, 1 RANDOM SAMPLE UNDER 10 LOTS. SAMPLE AT POINT OF APPLICATION, INCLUDE MFG CERT.	5 RANDOM SAMPLES PER PROJECT/CONTRACT REPRESENTING 10 OR MORE LOTS, 1 RANDOM SAMPLE UNDER 10 LOTS. SAMPLE AT POINT OF APPLICATION, INCLUDE MFG CERT.	
PEAT MOSS; BY SPECIAL PROVISION	MT403	1 LB. SAMPLE	1 SAMPLE PER PROJECT/CONTRACT.		
PILING; FLUTED TAPER STD. SPEC. 559	NONE	NONE	VISUAL INSPECTION.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SUBJECT TO FINAL FIELD INSPECTION.
PILING; H PILES STD. SPEC. 559	NONE	NONE	VISUAL INSPECTION.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SUBJECT TO FINAL FIELD INSPECTION.
PILING; PRESTRESSED CONCRETE STD. SPEC. 559	NONE	NONE	VISUAL INSPECTION.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SUBJECT TO FINAL FIELD INSPECTION.
PILING; ROUND STEEL STD. SPEC. 559	NONE	NONE	VISUAL INSPECTION.		ACCEPTED ON MANUFACTURER'S CERTIFICATION AND SUBJECT TO FINAL FIELD INSPECTION.
PILING; TREATED TIMBER STD. SPEC. 559	MT404	NONE	VISUAL INSPECTION.		INSPECTED AT MILL/TREATING PLANT AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.
PILING; UNTREATED TIMBER STD. SPEC. 559	MT404	NONE			INSPECTED AT MILL AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.

NOTE: Numbers in parentheses are page numbers

WOOD ITEMS; TIMBER TREATED STD. SPEC. 706	NONE	NONE	VISUAL INSPECTION.		INSPECTED AT THE MILL/TREATING PLANT AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.
WOOD ITEMS; TIMBER UNTREATED STD. SPEC. 706	NONE	NONE	VISUAL INSPECTION.		INSPECTED AT THE MILL/TREATING PLANT AND ACCEPTANCE ISSUED SUBJECT TO FINAL FIELD INSPECTION.

MT-601
SECTION II
Trade Name Products

1.0 Concrete Admixtures

1.1 Air Entraining Agents

MB-AE10	Master Builders Co.
Protex	Protex Industries, Inc.
Protex Concentrate	Protex Industries, Inc.

1.2 Water Reducer Admixtures Type A

Pozzolith 322N	Master Builders Co.
Pozzolith 122N	Master Builders Co.
Pozzolith 300N	Master Builders Co.
Protex PDA 25 DP	Protex Industries, Inc.
Protex PDA 25 XL	Protex Industries, Inc.
Pro-Krete N	Protex Industries, Inc.
PSI 400N	Gifford-Hill & Co., Inc.

1.3 Water Reducing & Retarding Admixtures Type D

Pozzolith 100R	Master Builders Co.
Pozzolith 122R	Master Builders Co.
Pozzolith 300R	Master Builders Co.
Protex PDA 25 DP	Protex Industries, Inc.
Protex PDA 25 R	Protex Industries, Inc.
Pro-Krete R	Protex Industries, Inc.

2.0 Concrete Curing Compounds

Promulsion 50 AW	Protex Industries, Inc.
LR-151 (Red Dye)	Protex Industries, Inc.
PW-3B (White)	Protex Industries, Inc.
Spec.-Cure (White)	Building Specialties
Spec.-Cure (Clear)	Building Specialties

3.0 Miscellaneous

Water Stop (bridges)	All Domestic Brands
Seed, Certified Blue Tag	Montana Seed Growers Association
Registered Purple Tag	Montana Seed Growers Association
Foundation - White Tag	Montana Seed Growers Association
Set 45	Set Products, Inc.
(Patching & Anchor Bolt Material)	
SS-1	All Domestic Brands
(Emulsified Binder for Seeding Under 10,000 gal.)	
Probond Epoxy	Protex Industries,
(ET-265 and ET-266)	Inc.
"Landglas" Fiberglass Roving	Owens Corning
